Disposal of Objections for the post of Nursing Officer (Staff Nurse Gr. II)
Date of Online Examination: 23.02.2020

Question ID	Nature of Objection	TCs SME Response	Reference	Objectoin Valid/Invalid	Action Required
810592219	Incorrect answer key	There are 62 lower extremity bones. Hence the objection is invalid.	Lower extremity bones: The 62 lower extremity bones consist of 10 hip and leg, 14 ankle and 38 foot bones. The 10 hip and leg bones are the innominate or hip bone (fusion of the ilium, ischium, and pubis), femur, tibia, fibula, and patella (kneecap) on each side.	Invalid	No change
810592247	Incorrect answer key	Shearing force is greatest in high fowler's position, hence the objection is invalid	Shearing force is most likely to develop during repositioning or when a patient slides down after being placed in high Fowler's position. However, simply elevating the head of the bed increases shear and pressure in the sacral and coccygeal areas because gravity pulls the body down but the skin on the back resists the motion due to friction between the skin and the sheets. The result is that the skeleton (and attached tissues) actually slides some-	Invalid	No change
810592258	Incorrect answer key	Cold compress is a moist application, hence the objection is invalid	 <pre> graph TD Root[CLASSIFICATION OF COLD APPLICATIONS] --> Local[LOCAL] Root --> General[GENERAL] Local --> LocalDry[Dry cold] Local --> LocalMoist[Moist cold] General --> GeneralDry[Dry cold] General --> GeneralMoist[Moist cold] LocalDry --> LocalDryList["•Ice bag •Ice collar •Ice pack (poultice) •Ice cradle •Chemical cold packs"] LocalMoist --> LocalMoistList["•Ice to suck •Cold compress •Evaporating lotion"] GeneralDry --> GeneralDryList["•Hypothermia"] GeneralMoist --> GeneralMoistList["•Cold sponging •Cold bath •Cold packs"] </pre>	Invalid	No change
